

New intensive optimization in O&O Defrag 27 brings Windows performance to a new level

Berlin, September 12, 2023

Berlin-based O&O Software GmbH has released O&O Defrag 27, its latest system optimization. The new Intensive Optimization enables the best defragmentation to date, even of locked system files under Windows 10 and 11.

The new Intensive Optimization (O&O IntensiveOptimize) is the fastest and at the same time most comprehensive optimization for Windows disks to date. A separate and exclusive instance of Windows is started, in which only O&O Defrag runs and can therefore not only exploit the maximum system performance for optimization, but also have access to all files at the same time. Regardless of whether these are system files or files exclusively locked during Windows operation.

As a cloud, this intensive optimization can be carried out completely autonomously and thus established as part of automated maintenance routines. An integration of this functionality into the IT Management platform O&O Syspectr is being prepared.

Olaf Kehrer, Managing Director at O&O Software: "Our Intensive Optimization is based on technology developed by us, which not only takes O&O Defrag 27 to a new level, but at the same time will be the basis for extremely exciting future developments from us."

Main features of O&O Defrag 27 at a glance

Intensiv Optimization: Isolated Windows environment for autonomous and complete optimization of the Windows system with maximum system performance and all-encompassing access to system and locked files.

Revised user interface: A modern view makes it easier for PC beginners to use, while the classic view is retained for professionals.

Optimal defragmentation methods: STEALTH, SPACE and COMPLETE have been revised for more efficient processes. With SOLID/COMPLETE and SOLID/Quick methods, the program offers special processes for defragmenting SSDs.

Advanced Tools: O&O DiskCleaner for the removal of temporary and superfluous files; O&O AppBuster for the complete uninstallation of unneeded software applications and Check & Re-pair for the automatic checking and repair of the system in the event of problems.

Update and health check: Automatic update to the latest version and S.M.A.R.T. functionality for monitoring drive health.

Optimization of virtual machines and SANs: O&O Defrag supports the optimization of virtual machines and Storage Attached Networks (SANs).

Dark Mode: Automatic adaptation to the Windows setting for dark mode.

Pricing and availability

O&O Defrag 27 is available now for 29.95 USD (single computer license) and 49.90 USD (5

computer license). All prices include 19% VAT.

For those who would like to try the product, a free 30-day trial version of O&O Defrag 27 Professional Edition is available on the official website: <https://www.oo-software.com/odefrag/>.

About O&O Software

O&O develops solutions for corporate customers that not only support them in their daily activities, but also help substantially reduce their costs. Our products for system optimization, data imaging, data recovery, secure data deletion and company-wide administration are pioneers in the Windows technology sector. Together with our worldwide network of partners, we support corporations, companies, public authorities and private customers in over 140 countries, all from our headquarters in Berlin, Germany.
