

O&O FormatRecovery V4 released: Data Recovery from Formatted Storage Media

With O&O FormatRecovery, files and folders lost through deletion or Virus attack can be recovered from all Windows recognized storage media. Formatted and newly partitioned hard disks can be recovered with consummate ease.

Berlin, April 13, 2006 – With the new O&O FormatRecovery V4, Berlin-based O&O Software has perfectly supplemented its line of data recovery products. O&O FormatRecovery enables the recovery of data from formatted or newly partitioned storage media.

O&O FormatRecovery slots in seamlessly between O&O UnErase and O&O DiskRecovery and users now have the luxury of being able to select the ideal product best qualified to solve each respective data recovery problem.

By use of a specially developed algorithm, O&O FormatRecovery V4 can search for files on formatted or deleted disks and restore them even when data is heavily fragmented.

O&O FormatRecovery enables the recovery of formatted storage media, including all file system information. This means systems can be used again immediately upon completion of the recovery session.

To recover data from damaged storage media O&O FormatRecovery first detects and then ignores defective sectors. It then proceeds with the recovery of data from storage media that is damaged but still accessible.

O&O InstantFormatRecovery enables a recovery session without prior software installation. In an emergency situation this means data located on damaged storage media may only be read. This prevents data being fully or partially overwritten during an installation and can thereby avoid a potentially fatal loss of data.

Previous knowledge or experience are not required as O&O FormatRecovery boasts an easily operated on-screen Assistant which helps guide users step by step through the whole recovery process.

O&O FormatRecovery V4 highlights:

- Recovery of files and directories
- Supports all Windows file systems (FAT, FAT32, NTFS and NTFS5)
- Supports the following types of Windows storage media: Hard disks, removable media, Memory Cards, Digital cameras
- One-of-a-kind: Fragmented files can also be rescued
- Recovery of hidden or system data including file attributes
- On-screen Assistant guides users through the whole recovery process
- Specially developed search algorithm to recover entire data storage media

- Includes O&O InstantFormatRecovery V4 for data recovery without prior software installation

O&O FormatRecovery is compatible with Windows XP, 2003, 2000 and NT. It is available in three versions. The recommended sales price for O&O FormatRecovery V4 Personal Edition for home users is USD 79,95 (Upgrade USD 49,90) and for the Admin Edition USD 310. Furthermore, companies providing a data recovery service can purchase the Tech Edition at a cost of USD 719.

O&O FormatRecovery V4 is also available as part of O&O RescueBox, the ideal product bundle for data recovery. O&O Software offers licensing options for companies and special conditions for governmental and educational institutions through master agreements.

Interested users can download a free trial version of the product from the O&O Software website. With the trial version users can search for lost files and use the newly integrated preview function.
