
O&O FormatRecovery 4.1 for Windows Vista released

With their newest Version O&O FormatRecovery 4.1, Berlin-based O&O Software GmbH has now made the program for rescuing data also available under Windows Vista. O&O FormatRecovery slots seamlessly in between O&O UnErase and O&O DiskRecovery. Users can select the product best suited to each specific data loss and thus achieve the best result possible each time.

Berlin, July 17th – Thanks to a specially developed search algorithm, O&O FormatRecovery can search through formatted or deleted partitions and recover data, even when the files are heavily fragmented. O&O FormatRecovery can recover data on formatted storage volumes, including the file system information. This means the system can be used immediately after recovery is complete. In order to rescue data on damaged storage volumes, O&O FormatRecovery jumps over damaged sectors and begins the data rescue process beyond the damaged sector.

O&O InstantFormatRecovery enables a Start up without prior installation. In an emergency, the affected storage volumes are purely read accessed, which prevents further data loss through an installation.

The user-friendly O&O FormatRecovery Assistant leads the user step-by-step through the data rescue, so that users with no prior experience or knowledge can easily use the program. Regardless of whether you are searching for data on a hard disk, USB Stick or on a digital camera – O&O FormatRecovery works on a whole range of Windows-supported volumes.

Important Features at a Glance:

- Recovery of files and directories
- Supports all Windows file systems (FAT, FAT32, NTFS and NTFS5)
- Supports all Windows storage volume types: hard disks, removable media, memory cards, digital cameras
- Unique: fragmented files can also be recovered
- Recovery of hidden or system files including data attributes
- Assistant leads you step-by-step through the entire data rescue process
- Specially developed algorithm to recover data from an entire storage volume
- Includes O&O InstantFormatRecovery 4.1 for data rescue without installation
- Runs under all versions of Windows Vista, XP, 2003 and 2000

O&O FormatRecovery is available in three versions. The recommended retail price for O&O FormatRecovery 4.1 Personal Edition for home users is EUR 79,90 (Upgrade EUR 49,90) and for the Admin Edition for corporate customers EUR 259,00. A Tech Edition is available for service providers at EUR 599,00. The full version can be ordered over the internet and is available as a Pack with printed instruction booklet from retailers. Owners of the current Version 4 of O&O FormatRecovery can upgrade to the new Version 4.1 free of charge.
