
O&O RescueBox 4.1 for Windows Vista released

With the O&O RescueBox 4.1, Berlin-based O&O Software has released the bundle for professional data rescue under Windows Vista. It contains three data rescue products that compliment each other, providing maximum opportunities to recover lost data. The O&O RescueBox underlines the Berlin Company's leadership in the data rescue field.

Berlin, July 17th – The O&O RescueBox Recovery CD is a bootable CD based on Windows PE. The three products O&O UnErase 4.1, O&O FormatRecovery 4.1 and O&O DiskRecovery 4.1 can be started directly from the CD. Also included is the O&O Recovery Assistant which helps the user interactively select the most appropriate product for the data rescue to hand. Users with no prior experience can also use the programs with no difficulty as all products boast an intuitive user interface.

O&O UnErase 4.1 rescues deleted files from intact file systems. If files are deleted from the hard disk, O&O UnErase quickly helps to fully recover them. Usage is just as easy as with Windows Explorer.

O&O FormatRecovery 4.1 helps with formatted hard disks. If the hard disk was formatted in error or the directory structure is damaged through virus, the data can be reconstructed. An Assistant helps with the recovery, leading users step-by-step through the recovery process.

O&O DiskRecovery 4.1 enables the reconstruction of data whose directory and file information have been deleted or overwritten. Thanks to the one-of-a-kind O&O DeepScan, over 400 different file types and versions can be recognized at sector level and recovered, even where the file system is badly damaged.

Important Features at a Glance:

- O&O UnErase 4.1 for recovering deleted data on intact file systems
- O&O FormatRecovery 4.1 for recovering data from formatted partitions
- O&O DiskRecovery 4.1 for recovering data from defective or overwritten file systems
- Starts directly from the O&O Recovery CD with Windows interface and enables the search for lost data when the computer won't start anymore
- Runs under all versions of Windows Vista, XP, 2003 and 2000. The CD can also be used on Windows 95/98/Me/NT.

The O&O RescueBox 4.1 is available in three different versions. The recommended retail price for the Personal Edition for home users is USD 99.95 (Upgrade USD 59.95) and for the Admin Edition for corporate customers USD 406.80. A Tech Edition is available for service providers at USD 826.80. The full version can be ordered over the internet and is available as a Pack with printed instruction booklet from retailers. Owners of the latest Version 4 of O&O RescueBox can upgrade to the new Version 4.1 at a cost of USD10.00 to cover the new CD mailing costs.

O&O Software offers companies an attractive license program and special conditions to public authorities through Master Agreements. Interested users can download a free trial version from the O&O Software website. The trial version can be used to search for lost files and use the newly integrated preview function.
