

## O&O RescueBox V4 Released: Data Recovery Software Launches Directly from CD

The new software suite, containing the products O&O UnErase V4, O&O FormatRecovery V4, and O&O DiskRecovery V4, empowers users with a one-of-a-kind data recovery tool that comes complete with its own built-in Windows operating system. Even missing data on unbootable computers can be recovered without the need for any prior software installation.

Berlin, March 10, 2006 – With the O&O RescueBox V4, Berlin-based O&O Software is launching a brand new product suite for professional-grade data recovery. The three contained products in the bundle compliment each other and together maximize the chances for success in recovering lost files. With O&O RescueBox, O&O raises the standard in software based data recovery, underlining their leadership in this market sector.

O&O RescueBox V4 comes delivered with a bootable Recovery CD, from which the three products O&O UnErase V4, O&O FormatRecovery V4 and O&O DiskRecovery V4 can be launched. Also included is the O&O Recovery Guide, which helps users in a focused and interactive fashion to select from the three products the most appropriate one for their data recovery. All three products have the look and feel of Windows making them easily understandable even without any previous knowledge.

O&O UnErase V4 rescues deleted files from intact file systems. If files are deleted from the hard disk, O&O UnErase will quickly be able to recover them. With a Windows Explorer similar interface, operating it is intuitive and simple.

O&O FormatRecovery V4 can recover data on mistakenly reformatted hard disks. If the hard disk is formatted or the file system is damaged by a virus, its files can be made readable again. The recovery works with the aid of an on-screen Assistant that leads you through the recovery process step by step.

O&O DiskRecovery V4 enables the recovery of files whose directory and file information have been either deleted or overwritten. By means of O&O DeepScan Technology, over 350 different file types and versions can be recognized and recovered, among them even those from the most severely damaged file systems.

Highlights of the O&O RescueBox V4:

- O&O UnErase V4 for recovering deleted files on intact file systems
- O&O FormatRecovery V4 for recovery of files from formatted partitions
- O&O DiskRecovery V4 for data recovery from damaged or overwritten file systems
- Starts directly from the O&O Recovery CD with a built-in Windows operating system, enabling the safe search for lost files on unbootable computers

The O&O RescueBox is compatible with Windows 95/98/Me, as well as Windows XP/2000/NT and Windows 2003. It is available in three versions. The Personal

Edition is available for home users in the form of a single computer license USD 89.95 (Upgrade USD 49.95). Business customers can purchase the Admin Edition licensed per administrator good for use on multiple computers for USD 349.00 (Upgrade USD 209.00). Companies offering data recovery services can purchase the Tech Edition for USD 799.00 (Upgrade USD 449.00). O&O Software has licensing options for companies and special conditions for governmental and educational institutions through master agreements.

Interested users can find further information about the new O&O RescueBox V4 on the O&O Software website. Text and product imagery for use by the media are available online in the O&O PressCenter at <http://www.oo-software.com/en/press/>
