## O&O BlueCon 7 with flatrate backup images

O&O Software of Berlin, Germany has today released the new version 7 of O&O BlueCon. For the first time, a new form of licensing allows for backups to be created and restored for a limitless number of computers. This saves both administrators and service technicians the time-consuming task of counting computers and licenses, as well as obtaining new ones when several additional computers need to be installed. O&O BlueCon 7 also offers native support for Windows Vista and contains a whole myriad of tools for rescuing data and systems, all deployed over the tried and trusted Windows interface.

Berlin, November 20, 2007 – O&O BlueCon is considered the standard commercial tool for rescuing computer systems. Based on the current Windows PE operating system for Vista, it provides a wide range of programs designed to recover systems that will no longer start up. Amongst many other functions, entries in the registry database as well as user accounts can be changed or newly created with ease. O&O BlueCon starts all programs direct from the CD, which is included with delivery. This prevents a further data loss when new data is written to the computer, which can occur during a new installation, for example.

The seamless integration of all the components contained in O&O BlueCon saves the user having to package numerous different programs together, some of which will often only run with the help of patches anyway. Similarly, there is no danger of dubious licensing structures through the use of commercial software on Windows PE, as all system tools were developed safely by O&O Software. A notable highlight is the integrated O&O DriverLoader, which automatically detects all system components and loads the appropriate driver. Should a driver for a specific hardware device not be available, the user can integrate it into the running system with just a few mouse clicks and then gain full access to the device concerned.

### **Deployment onto computers with O&O DiskImage Server Edition**

O&O BlueCon is available in two versions: the Admin Edition is licensed per administrator and can be used on an unlimited number of machines within a company. The Tech Edition is not bound solely to a company, but can also be used in other companies as part of a service. Also included in the Tech Edition is unrestricted use of the latest version of O&O DiskImage Server Edition, enabling the license holder to make any number of system backups and then later restore them. This is particularly economical and practical for rolling out computers with standardized images, as there are no hidden or extra license costs. The O&O DiskImage 2 Server Edition included here can be deployed on both desktop and server systems.

### **Data recovery with the O&O RescueBox**

The newest version of the O&O RescueBox is also included in the latest version 7 of O&O BlueCon. The three programs O&O DiskRecovery, O&O FormatRecovery and O&O UnErase provide for quick and reliable data rescue when a system is hit by a virus attack or software defect. Crucial business documents can be rescued without having to start, which could potentially be infected.

## Secure deletion of data

Also included in delivery is O&O SafeErase 3 for the secure deletion of data. Files, partitions or even entire computers can be deleted so securely that a further recovery is rendered impossible. A data volume deleted using O&O SafeErase can be disposed of or passed on with no risk involved

### Important Features at a Glance:

- Software starts direct from CD with no prior installation
- Windows user interface with full mouse support
- O&O DiskImage Server Edition for creating and restoring images (Tech Edition only)
- O&O SafeErase for secure deletion of files, partitions and entire computers
- O&O EventViewer for displaying system events
- O&O RegEdit for editing the registry database
- O&O UserManager for creating, deleting and changing user accounts and passwords
- O&O DeviceManager for administrating drivers
- O&O SystemInformation for detailed system information
- O&O FileExplorer for all important file operations
- O&O UnErase for rescuing accidentally deleted files
- O&O FormatRecovery for rescuing data from deleted partitions or hard disks
- O&O DiskRecovery for rescuing data from hard disks whose file structure was destroyed
- Integrated web browser
- Checkdisk function for scanning hard disks
- Free selection of network support
- Runs under all editions of Windows Vista, XP, 2003 and 2000 O&O FormatRecovery 4.1 for recovering data from formatted partitions
- O&O DiskRecovery 4.1 for recovering data from defective or overwritten file systems
- Starts directly from the O&O Recovery CD with Windows interface and enables the search for lost data when the computer won't start anymore
- Runs under all versions of Windows Vista, XP, 2003 and 2000. The CD can also be used on Windows 95/98/Me/NT.

O&O BlueCon 7 is available in two versions. The recommended retail price for the Admin Edition is USD 1,079.00 (Upgrade from a previous version USD 644.00). The Tech Edition incl. O&O DiskImage Server Edition retails at USD 5,989.00 (Upgrade from a previous version USD 3,591.00). O&O BlueCon 7 can be ordered through the O&O website as well as from retailers and distributors. All prices include a one year maintenance agreement and exclude VAT.

### About O&O Software

O&O Software GmbH has been developing "Tools for Windows" since 1997. Customers include home users, SMEs, public institutions and global business groups. These tools are effectually sold directly and by using our partner network and are available in more than 50 countries. The product portfolio includes applications for performance optimization, system administration, data restoration and the secure deletion of data. O&O products have been judged as technologically leading in numerous tests. You can find more information and free trial versions of all products on our website. O&O's products include O&O BlueCon, O&O CleverCache,

O&O Defrag, O&O DiskImage, O&O DiskRecovery, O&O DiskStat, O&O DriveLED, O&O FormatRecovery, O&O MediaRecovery, O&O RescueBox, O&O SafeErase, O&O ToolBox and O&O UnErase.
