
O&O ToolBox MMVIII is THE tool collection for your PC

Just in time for the start of the European Football Championship, O&O Software brings its popular and award-winning tool collection, O&O ToolBox MMVIII, onto the field with a whole new set of players.

Berlin, 10 June, 2008 – Your computer is dragging: are programs, musical files, and videos taking up more and more place on the hard disk? On top of all that, you're wondering if the photos of your girlfriend on the digital camera you sold a short time ago are really deleted, or maybe the new owner will still be able to restore them?

Thanks to the unique O&O ToolBox MMVIII product suite, problems like these are consigned to the history books.

Containing one-seat licenses of O&O Defrag 10 Professional Edition, O&O DiskStat Professional Edition, and O&O SafeErase 3, the O&O ToolBox MMVIII offers Windows home users all the software necessary for optimizing and monitoring their computer's performance, while giving them complete protection against any unauthorized access to their deleted files.

The Programs at a Glance:

O&O Defrag 10 Professional Edition

The multiple award-winning O&O Defrag 10 Professional Edition revives the hidden performance of a computer. It optimizes the hard disk and merges data fragments back together again. O&O Defrag 10 Professional Edition is eminently easy to use and offers you an array of important functions. O&O Software offers companies an attractive license program and special conditions to public authorities through Master Agreements. Interested users can download a free trial version from the O&O Software website. The trial version can be used to search for lost files and use the newly integrated preview function.

O&O DiskStat Professional Edition

O&O DiskStat enables you to search for those files and folders that are taking up too much space on a hard disk, and thereby causing it to work slower. This versatile tool provides an intuitive and graphically appealing interface, along with many options for hunting down sources of space-waste in your system.

O&O SafeErase 3

O&O SafeErase 3 is THE solution for securely deleting sensitive data from a hard disk, and offers you complete protection of your privacy. At the push of a button, the multiple-award winning O&O SafeErase 3 lets you delete files, folders, partitions, and even the entire free space on a hard disk. This also prevents the data you deleted before installing O&O SafeErase being accessed or restored by unauthorized parties.

O&O ToolBox MMVIII, containing these three unbeatable products, can be run under Windows XP/2000/Vista. The suggested retail price is USD 69.95. Owners of any full

version of an O&O product contained in the package, or an older version of the O&O ToolBox, can purchase an upgrade to the new O&O ToolBox MMVIII for just USD 39.95.

O&O ToolBox MMVIII is distributed by Lifeboat Distribution. Additional distributors can be found under <http://www.oo-software.com/partner/en/distributor/>

Free test versions of the products contained in O&O ToolBox MMVIII can be downloaded on the website of O&O Software GmbH. Just visit www.oo-software.com.
