
O&O Defrag 11 is now available

Berlin, September 15, 2008 – Version 11 of O&O Defrag Professional and Server Edition is now available. The multiple award-winning defragmentation program from the Berlin-based publisher, O&O Software, optimizes hard disks while merging file fragments efficiently and securely.

The new background defragmentation feature provides automatic protection against heavy fragmentation. For the first time ever, it's now possible to defragment entire hard disks and partitions as well as individual folders or files by simply right-clicking. The new File Status View shows the number of most heavily affected files as well as their level of fragmentation.

O&O Defrag 11 is available in the Professional Edition for 49,90 Euro and in the Server Edition for 249,00 Euro*. An Upgrade from a previous version of the Professional Edition costs 29,90 Euro and for the Server Edition 149,00 Euro*

(* Local taxes may apply)

New features and technologies

Thanks to its new background monitoring, O&O Defrag 11 prevents fragmentation from occurring at its earliest stages. Newly added and modified files are analyzed and defragmented whenever they're not being used. This allows O&O Defrag to ensure, behind the scenes, that your hard disks are constantly performing at their best.

Newly developed technologies allow Defrag 11 to be better integrated into Windows Vista, and provide for efficient processing of especially large file systems while requiring only a minimum of space in the main memory.

For the first time ever, O&O Defrag 11 lets you defragment individual files and folders as well as partitions and entire hard disks by simply right-clicking. The new File Status View is based on the already familiar Block View, which has itself been improved and extended in the new version. The File Status View displays the most heavily fragmented files as well as their number and level of fragmentation.

Product features

- New: Protection from heavy fragmentation through background monitoring and immediate defragmentation
- New: Defragmentation of individual folders and files by right-clicking
- New: Optimized File Status View and enhanced Block View
- Job Wizard for regular and automated defragmentation
- Five defragmentation methods
- O&O IntelligentPower Control Technology in the Professional Edition provides special support for mobile systems
- O&O OneButtonDefrag for the easy scheduling of defragmentation on a regular basis
- O&O ActivityGuardPro for lowest system load
- Easy management of extremely large amounts of data, even above the 2 terabyte level, as well as very large files

Prices & Availability

O&O Defrag 11 Professional Edition is available in stores and over the O&O Online Shop as a one-seat license for 49,90 Euro and as an Upgrade for 29,90 Euro. A one-seat license of the O&O Defrag 11 Server Edition can be purchased for 249,00 Euro* in the Full Version and for 149,00 Euro* as an Upgrade.
