
O&O Defrag 12: New technological breakthrough for the new Windows 7

Advance notice

Berlin, August 25, 2009 – Berlin-based software publisher O&O Software proudly announces the release of a new version of O&O Defrag. Version 12 will be available from the 15th September, 2009 in the Professional, Server and Workstation Editions. As with the previous version, the O&O Enterprise Management Console 3 will provide central network control.

O&O Defrag 12 is the first and only product worldwide to combine time-saving Zone Filing with automatic background monitoring.

The Upgrade from a previous version or competing commercial product to O&O Defrag 12 Professional Edition costs \$29.95, with the full version costing \$49.95. The O&O Defrag 12 Server Edition full version will retail at \$249.00 and \$149.00 for the Upgrade. O&O Defrag 12 Workstation Edition will be available as a volume license, with a price at the lowest 5+ level of \$42.00 per license.

New functions

Zone Filing: Certain data, like system files, are accessed very regularly by users. In order to improve the access time, O&O Defrag 12 analyzes the data during the first defragmentation, and then "files" them according to purpose and access regularity in three different "Zones". System files, for example, are filed in the first Zone, enabling them to be accessed much quicker. O&O Defrag 12 files very large files, or ones rarely used, in the third Zone. They then fragment less, reducing time required for future jobs.

New defragmentation methods: It is specifically for Zone Filing that O&O has developed three new defrag methods in Version 12 (OPTIMIZE, OPTIMIZE/QUICK and OPTIMIZE/COMPLETE), that not only organize files but - in combination with the existing methods - massively reduce the level of fragmentation: OPTIMIZE uses a SPACE defrag method to organize files in the three zones so that remaining free disk space sits together as one.

OPTIMIZE/QUICK defragments at great speed using the bare minimum of memory. All files are also sorted into the correct Zones.

OPTIMIZE/COMPLETE is recommended, like the existing COMPLETE method, when all files need to be reorganized on the hard disk.

In addition to the existing five methods, the new methods serve to hugely speed up defragmentation jobs and ensure users files are correctly placed for optimal access. By deactivating Zone Filing, the user can then simply select one of the old methods for optimized future defrag success.

Advanced Background Monitoring: Up until now, the background monitoring was used to monitor the whole system. With O&O Defrag 12, the user can now also select individual drives in order to monitor and optimize their level of fragmentation.

Netbooks and Notebooks: As soon as such mobile machines are no longer connected to the mains, the defragmentation is interrupted in order to conserve battery life and duration.

Price and availability:

The Upgrade from a previous version or competing commercial product to O&O Defrag 12 Professional Edition costs \$29.95, with the full version costing \$49.95. The O&O Defrag 12 Server Edition full version will retail at \$249.00 and \$149.00 for the Upgrade. Customers will be able to purchase O&O Defrag 12 from all renowned retailers and from resellers. O&O Defrag 12 Workstation Edition will be available exclusively as a volume license through trading partners, with a price at the lowest 5+ level of \$42.00 per license.

Resellers can obtain O&O Defrag 12 from O&O Authorized Distributors such as Pillar Solutions in the UK and Lifeboat and VP Technologies in the USA. A full list of all O&O Distributors can be found at <http://www.oo-software.com/partner/en/distributor/>

About O&O Software
