
O&O Enterprise Management Console 3 eases Network Management

Berlin, September 15, 2009– Berlin-based Software publisher O&O releases a new version 3 of its O&O Enterprise Management Console, the management tool for O&O products. It centrally distributes and controls O&O programs across entire networks. The O&O Enterprise Management Console 3 contains the defragmentation solution O&O Defrag 12, also released today, as well as the current versions of the data imaging tool O&O DiskImage and O&O DiskStat. More products will follow.

Based on the Microsoft SQL Server, the Console can be integrated into an existing Microsoft SQL Database or the Microsoft SQL Server Express included in delivery. Network management is therefore also suitable for smaller networks.

New and overhauled functions

Remote Installation: The O&O Control Service organizes the communication between the O&O programs and the O&O Enterprise Management Console. The O&O Programs carry out the jobs and transmit status reports to the O&O Control Service.

Job Assistant: The job assistant allows you to run scheduled functions of selected O&O programs across a network. You can use the various settings in the job assistant to specify the frequency of a job or select the computer, site or drives upon which the job should be run. All events are recorded in detailed reports and saved in the database, so that job status information is constantly available.

Advanced Reports: Reports on jobs, installation or uninstalls are put together into group reports, giving the user a clear and quick overview at all times.

Report Management: The Administrator can define how long reports are retained, and automatically delete old reports. Thanks to versatile search functions, reports can be found easily and quickly.

Step-by-step Assistant: Initial setup is made easy thanks to an Assistant leading the user through all the important stages.

Security: The optional SSL Encryption ensures that data cannot be read or manipulated during its transfer from the computer to the Service. O&O Enterprise Management Console is thereby able to provide you with the highest level of security and protect you from so-called "Man-in-the Middle" attacks, by which unauthorized parties gain access to your communication across a network.

Maintenance Agreement

Under the scope of the O&O EasyLicensing Maintenance Agreements, product upgrades and support requests are free for the defined time period (yearly).

Price and availability

The O&O Enterprise Management Console 3 costs €499,00 including a 1 year Maintenance Agreement. O&O Enterprise Management Console 3 is exclusively

available through resellers. Resellers can obtain the Console from O&O Authorized Distributors such as Pillar Solutions in the UK and Lifeboat and VP Technologies in the USA. A full list of all O&O Distributors can be found at <http://www.oo-software.com/partner/en/distributor/>
