
O&O ToolBox 25: Increased performance, data monitoring and much more, now under Windows 7

Berlin, November 12, 2009 – Products from Berlin-based O&O Software are worth every cent. 12+7+2+4 stands for increased performance, data security and data monitoring under Windows 7, or simply: O&O ToolBox 25. The newly integrated O&O CleverCache 7 increases PC performance under Windows 7. Together with the other products O&O Defrag 12, O&O DiskStat 2 and O&O SafeErase 4, Windows home users have here in one Box all the programs they need for PC performance, data monitoring and secure data deletion.

The four single products O&O Defrag 12, O&O CleverCache 7, O&O DiskStat 2 and O&O SafeErase 4 are available from retail outlets as the O&O ToolBox 25 for 69.90 Euros. O&O Software GmbH offers resellers an attractive Upselling Program. More information can be obtained from the O&O Partner Team.

The programs at a glance

O&O CleverCache 7 Professional Edition

O&O CleverCache 7 Professional is a unique tool that optimizes the File Cache Management for Windows Vista, XP and Windows 7. This results in an enormous increase in performance boosting a system's performance at times to up to twice its original speed. All this is achieved without the need for additional hardware or any reduction in your system's stability. You simply install O&O CleverCache 7 and you're ready to go – no need to reboot.

O&O DiskStat 2 Professional Edition

O&O DiskStat is a high-power tool for analyzing the used disk space on your storage volumes. With an easy-to-use interface based on the design of the Windows Explorer, you can take a closer look at the file and folder structure of your internal and external drives. Through intuitive and attractive graphical representations you will find out which files, file types and folders are taking up the most space.

O&O Defrag 12 Professional Edition

O&O Defrag 12 is the only tool of its kind that combines zone filing and background monitoring. Zone filing means that all system's files are sorted by O&O Defrag 12 according to their level of use, and each one will be separated into its own section of the hard disk, decreasing start-up times and subsequent defragmentation process times. Using background monitoring, users can select individual drives that they wish to constantly monitor and defragment.

O&O SafeErase 4

With the new version 4 of O&O SafeErase, it is now possible for the very first time to delete sensitive internet data too. The various internet browsers, such as Microsoft Internet Explorer, Mozilla Firefox or Google Chrome are automatically displayed, and the user just has to select which internet data he wishes to delete - for example

Cookies or temporary files – and from which browser. O&O SafeErase 4 also has customized deletion profiles integrated.
