

O&O CleverCache V6.1 for Windows Vista Released

O&O Software GmbH from Berlin, Germany has today released the new Windows Vista compatible Version 6.1 of their renowned O&O CleverCache program for memory optimization. O&O CleverCache optimizes the Windows memory and file cache management functions, using optimal settings to achieve substantial increases in performance for workstations and servers. This saves users the costs involved in purchasing and integrating new memory modules.

Berlin, 19 February, 2007 – The inefficient memory management under Windows also results in unnecessary performance losses under Windows Vista, which supports both the 32 and 64-bit variations. With the 64-bit version from Vista, the removal of the previous cap of 960 MB for the file cache means even more dramatic performance loss can occur through simple file operations. These operations are conducted swiftly, but in the case of some large files can use up the entire main memory, making further operations much, much tougher.

O&O CleverCache V6.1 optimizes the settings for the file cache automatically and monitors the entire system workload. Should applications or the operating system be using up too much main memory for the cache, the program will automatically restrict it. This means that sufficient memory is now available for other applications and the computer can continue to be used without any major impact.

For todays computer games, which not only use up a lot of main memory but also demand quicker response times, O&O CleverCache is the perfect supplement for the ultimate gaming experience. The integrated Mem-O-Free also ensure that the main memory is regularly defragmented. Mem-O-Free merges many small game segments into fewer, larger forms, meaning the system can both organize and localize free areas much quicker.

The integrated profiles mean users can individually set their systems to suit their preferred requirements. This enables O&O CleverCache to perfectly customize all memory requirements. The program already contains numerous predefined profiles created to accommodate a whole range of application requirements. In addition, users can also create, save and export their own profiles to make them available to other O&O CleverCache users.

The Important Features at a Glance:

- Improved file cache management for Windows
- O&O AutoSense Profile (predefined user profile)
- Create, export and import individual profiles
- Monitors the important system components (CPU, memory etc.), system tuning and advanced control and monitoring over the Tasktray.
- Mem-O-Free for more available main memory
- Mem-O-Safe for increased security in case of a system crash
- Detailed memory use and cache statistics
- Professional and Server Edition for optimal performance from desktop and server systems

Runs under all versions of Windows Vista, XP, 2003, 2000 and NT (depending on the product version)

O&O CleverCache is available in two versions. The recommended retail price for O&O CleverCache V6.1 Professional Edition is USD 29.95 (Upgrade USD 19.95) and for the Server Edition USD 99.95 (Upgrade USD 59.95). The full versions can be ordered online or as a retail box with a printed User's Guide from your local retailer.

O&O Software offers licensing options for companies and special conditions for governmental and educational institutions through master agreements. Interested users can download a free 30 day trial version of the product from the O&O Software website. *(Released for reproduction)*

About O&O Software

O&O Software GmbH has been developing "Tools for Windows" since 1997. Customers include home users, SMEs, public institutions and global business groups. These tools are effectually sold directly and by using our partner network and are available in more than 50 countries. The product portfolio includes applications for performance optimization, system administration, data restoration and the secure deletion of data. O&O products have been judged as technologically leading in numerous tests. You can find more information and free trial versions of all products on our website. O&O's products include O&O BlueCon, O&O CleverCache, O&O Defrag, O&O DiskImage, O&O DiskRecovery, O&O DriveLED, O&O FormatRecovery, O&O MediaRecovery, O&O RescueBox, O&O SafeErase, O&O ToolBox and O&O UnErase
