

## O&O DiskRecovery V4.0 Released: Data Recovery now with Preview and Document Repair Functions

O&O DiskRecovery can now recognize and recover over 350 different file types. In addition, the brand new built-in preview function for image and text files allows users to examine their files before they recover them.

Berlin, February 9, 2006 – O&O DiskRecovery V4.0 is the newest addition to Berlin-based O&O Software's line of professional-grade "Tools for Windows". This user-friendly data recovery tool can rescue data even when directory and structural information have been damaged or deleted. Using specially designed processes, this software will find damaged files and attempt to reconstruct them in a valid file format. This new generation of O&O DiskRecovery with its new and improved functionality presents both private and corporate users a powerful software tool for rescuing important data presumed to be lost.

A variety of professional-grade scan methods are available. O&O DeepScan empowers users with the maximum scan resolution, detecting even the smallest of files. O&O SmartScan will ignore existing files, allowing the scan to pick up and recover only deleted files. Alternatively, the O&O RawScan method scans without any regards to the currently installed file system. This is a great way to find lost data on a repartitioned hard disk.

The newly integrated file preview function in O&O DiskRecovery for image and text files enables users to examine found files before they are recovered. This functionality can be a huge help when looking for specific deleted files.

More than 350 file types and file versions can be detected and recovered in O&O DiskRecovery. Users can set their scans to look for as many or as few different file types as they desire.

Additional user-defined file signatures can also be manually defined, meaning that users can instruct O&O DiskRecovery to scan for virtually any type of file. Even exotic file types can be recovered by O&O DiskRecovery.

O&O InstantDiskRecovery allows for the use of the software in an emergency without any prior installation, enabling users to avoid irreparable data loss due to the initial installation of the software.

O&O DiskRecovery V4.0 Highlights:

- Professional Scan Algorithms with O&O DeepScan, O&O SmartScan, and O&O RawScan Technologies
- Integrated Repair Function for Damaged Office Documents
- Preview Function for Image and Text Files
- Detection and Restoration of Over 350 File Types
- User-defined File Signatures

- Targeted File Scans with Definable Search Parameters
- O&O InstantDiskRecovery Bootable from the Product CD

O&O DiskRecovery is compatible with current versions of Windows and is available in three different license versions. The Personal Edition for home users can recover up to 100 files in a single data recovery session. The Admin Edition can recover an unlimited number of files at a time. A Tech Edition is also available for customers wishing to provide data recovery services to their clients. The recommended retail price of O&O DiskRecovery V4.0 Personal Edition is \$79.95 (Upgrade for \$49.95). The Admin Edition costs \$299.00 (Upgrade \$179.00). The Tech Edition is priced at \$699.00 (Upgrade \$419.00). O&O Software has a variety of attractive licensing options for corporate customers and special conditions for public institutions by way of master agreements.

Interested users can download a trial version of the software from the O&O Software website. The trial version allows for the scanning of volumes for lost files and use of the newly integrated file preview function.

Text and product imagery for use by the media are available in the O&O PressCenter at: <http://www.oo-software.com/en/press/>
