## O&O MediaRecovery 6: Rescue photos, videos and music files deleted in error

Berlin, August 18, 2009 – Berlin-based Software publisher O&O offers with immediate effect the new version of its highly successful "multi-media file rescue" tool, O&O MediaRecovery 6.

In this digital world of ours, data gets deleted simply and quickly, be it as a result of a virus attack, program crash or simply through pressing the wrong button. This is particularly painful when it involves baby, wedding or holiday photos, for example, which most everyone now stores digitally. Help is now at hand with O&O MediaRecovery 6, which not only saves time, but also the stress and money involved in a data loss.

User-friendly: accidentally deleted files can be recovered directly from digital cameras, memory cards and USB Sticks. They must simply be supported by Windows as a drive

### **New and improved functions**

**Various search algorithms:** O&O MediaRecovery combines the powerful search processes of the hugely successful data recovery products O&O DiskRecovery and O&O UnErase. It is specifically optimized for multi-media files to achieve the best recovery results possible. Files located using the technology from O&O UnErase are recovered with various file information, while the technology from O&O DiskRecovery even searches for files whose file information has been damaged – either by formatting or overwriting of the file directory.

**Data image inclusion:** Data images created by O&O DiskImage can now be included in recoveries for the very first time. To prevent a data loss through defective hardware, a forensic image can be created using the separately available O&O DiskImage. This comprehensive image also saves the (assumed) free disk space so that a full data recovery can be carried out later without touching the original hardware.

**Filter function:** Search results are presented in a clear overview, thanks to filters which sort by size or time (creation/last modified/last accessed). The filters can also blend out empty directories or files for refined search results.

### **Price and availability**

O&O MediaRecovery 6 single computer license in the full version costs \$29.95, and an Upgrade from a previous version or competing commercial product costs \$19.95. O&O MediaRecovery 6 is available in most leading stores including Amazon, and from trade retailers.

Resellers can obtain O&O MediaRecovery 6 from O&O Authorized Distributors such as Pillar Solutions in the UK and Apacabar in France. A full list of all O&O Distributors can be found at <http://www.oo-software.com/partner/en/distributor/>

Interested users can find a free trial version of O&O MediaRecovery 6 on the O&O website: [www.oo-software.com](http://www.oo-software.com). The trial version allows users to test what data can be found for up to 30 days. An actual data recovery is not possible with the trial version.

#### **About O&O Software**

O&O develops solutions for corporate customers that not only support them in their daily activities, but also help substantially reduce their costs. Our products for system optimization, data imaging, data recovery, secure data deletion and company-wide administration are pioneers in the Windows technology sector. Together with our worldwide network of partners, we support corporations, companies, public authorities and private customers in over 140 countries, all from our headquarters in Berlin, Germany.
