

Free Screen Saver Add-on for O&O Defrag V8.0 Released

With the brand-new "O&O Defrag ScreenSaver" add-on, O&O has created the first ever screen saver that actively controls the defragmentation of a computer, displaying real-time 3D graphics that charts O&O Defrag's progress, cluster by cluster. All users of O&O Defrag V8 may install and use this screen saver add-on.

Berlin, November 9, 2005 – As a free add-on, the Berlin-based software vendor, O&O Software, is offering the new O&O Defrag ScreenSaver to all users of O&O Defrag. The O&O Defrag ScreenSaver gives users the ability to run a defragmentation of their system partitions in Screen Saver Mode and track its progress through beautifully-crafted graphics. Incorporating the powerful O&O Defrag engine to automatically optimize hard disks, this add-on dramatically decreases the need for user interaction in the defragmentation process with its autonomous operation in the background.

By harnessing OpenGL technology, the O&O Defrag ScreenSaver generates live 3D representations of a partition's clusters; unprecedented on the system optimization market today.

Like other screen savers in Windows, the O&O Defrag ScreenSaver can easily be configured to meet a user's needs. Among other options, users can not only individually define the drives they would like to have defragmented, but also stipulate the method by which those drives are to be optimized. Whenever the screen saver is interrupted, the current defragmentation is halted, remembering its last position. As soon as the screen saver is activated again, O&O Defrag will continue exactly where it left off.

The O&O Defrag ScreenSaver add-on is compatible with all version of Windows XP/2003/2000/NT on Workstations and Servers. The free add-on is free of charge for registered users of O&O Defrag V8 Professional and Server Edition.

Interested users can find this free download on the O&O Software website. Text and product imagery for use by the media are available in the O&O PressCenter at: <http://www.oo-software.com/en/press/>

About O&O Software

O&O Software GmbH has been developing "Tools for Windows" since 1997. Customers include home users, SMEs, public institutions and global business groups. These tools are effectually sold directly and by using our partner network and are available in more

than 50 countries. The product portfolio includes applications for performance optimization, data restoration and the secure deletion of data. O&O products have been judged as technologically leading in numerous tests. You can find more information and free trial versions of all products on our website. O&O's products include O&O BlueCon, O&O CleverCache, O&O Defrag, O&O DiskRecovery, O&O DriveLED, O&O SafeErase, O&O UnErase.
