

O&O RegEditor: New Freeware for editing the Windows Registry

Changing or creating new settings on computers is part of the daily routine of every administrator. Berlin-based O&O Software GmbH now releases O&O RegEditor, a freeware application that makes it significantly easier for administrators to work with the registration database.

Berlin, January 20, 2016 - Whether we're talking about the adept home-user or an administrator, O&O RegEditor makes the job easier and quicker. It comes with an eminently user-friendly application, but it is really its portability that makes the life of an administrator much easier. No installation is needed and all settings are saved in the Profile data, so that O&O RegEditor can easily be used on other computers. Special versions in 32 and 64-Bit are available, meaning certain registry entries can be edited on 64-Bit systems that are normally hidden from 32-Bit users.

O&O RegEditor simplifies working with the registration database.

In addition to the virtue of working regardless of location, O&O RegEditor makes accessing registration databases in Windows systems particularly quick and simple. A comprehensive range of standard features are available, all of which are quicker and more streamlined thanks to optimized accessibility and user-friendliness. For example, after a high-precision search is performed, a list of results is displayed, together with the corresponding key paths. In addition, searches are performed without users having to make those irritating confirmations of every interim result. Users can also copy paths direct from websites or manuals into the address line and navigate straight to them. As a history of all paths visited is saved, navigating between different keys is quick and easy. The ability to simply copy and paste complete registry keys and subkeys is especially helpful when testing settings, in order to save old settings for restoration at a later date.

Functions at a glance

- Convenient search function
- Copy and paste of entire keys, subkeys and their values
- Simplified editing
- Start from portable storage devices
- Create, manage, import and export favorites
- Frequently used keys can be preset as favorites
- REG files optimized for import and export
- Export the Registry in XML format

O&O RegEditor is also a component of O&O BlueCon

The O&O RegEditor was originally developed both as an integral component of O&O BlueCon and for the development of our own products. O&O BlueCon is a comprehensive pack of tools for administrators that enable system restorations, system images and much more under Windows. It can be started direct from a USB or

CD/DVD with a full Windows user interface for when a system will no longer start and needs rescuing.

Price and availability

O&O RegEditor is entirely free of charge and is available to download from the O&O Homepage at <https://www.oo-software.com/en/ooregeditor>.

About O&O Software

O&O develops solutions for corporate customers that not only support them in their daily activities, but also help substantially reduce their costs.
