O&O Defrag 30: The Optimization Suite for Windows 11

Berlin, September 16, 2025

Berlin-based O&O Software GmbH is releasing O&O Defrag 30, the latest version of its globally successful and renowned system optimization for Windows. O&O IntensiveOptimize has been improved and is a unique solution worldwide for externally optimizing the entire Windows system in safe mode, allowing even locked files to be defragmented. The newly integrated O&O Startup Manager can shorten the waiting time when Windows starts by disabling or deleting programs, tasks, and services.

Optimizations for Windows 11 – but also for Windows 10

For the upcoming end of support for Windows 10, we have once again intensively optimized O&O Defrag for the new features of Windows 11 and enhanced it with additional tools, although all functions continue to work under Windows 10. In addition to the well-known optimization of hard drives and SSDs, direct performance gains can now be achieved by removing applications or disabling them at Windows startup.

We have also integrated our Check and Repair technology from O&O DiskImage into O&O Defrag, allowing you to automatically repair Windows problems with just the click of a button.

Revised, modern user interface

As part of this expansion, the modern user interface of O&O Defrag has also been revised and simplified, allowing automatic optimization in the background to be activated with a single click. The integration of O&O IntensiveOptimize, the new Boot-Time Optimization, and the existing and new tools has also been significantly simplified.

New Boot-Time Optimization and Improved O&O IntensiveOptimize

The new Boot-Time Optimization offers fully automatic optimization before Windows actually starts, ensuring that all files can be optimized. This particularly applies to critical system files that are locked during Windows startup and can cause significant performance losses.

With the revised O&O IntensiveOptimize, we also offer ambitious users the opportunity to optimize their system in their own Windows environment. Also with full access to all user and system files.

With the improvements in version 30, setup is just a click of the mouse, and even BitLocker-encrypted drives can be easily and securely optimized in their own Windows environment.

O&O StartupManager: Remove Unnecessary Ballast at Startup

O&O StartupManager provides a clear overview of all programs, tasks, and services that run automatically when Windows starts. With detailed information about each program—including its impact on system startup time—it's easy to decide which programs should be enabled or disabled. Unnecessary applications are marked and can be disabled with a click of the mouse. Defective startup entries are also detected and can be deleted. This shortens the computer's startup time and ensures it's ready for use more quickly.

O&O AppBuster: Remove Unnecessary Applications

With O&O AppBuster, multiple applications can be automatically uninstalled at the touch of a button. With the new application classifications, whether they are useful or not, you can quickly get an overview of which applications need to be uninstalled. O&O AppBuster can remove not only Windows desktop applications but also applications from the Microsoft Store. This also prevents them from being automatically installed for new users of the system, which is the default Windows setting.

O&O VisualDisk: Visualization of Write Access on SSDs

O&O VisualDisk clearly displays write access to the hard drive, such as flash-based storage media such as SSDs and NVMe drives. The improved version not only has a redesigned user interface but also improves performance when displaying accesses. O&O VisualDisk demonstrates how optimizing disks can help reduce future write accesses and extend the lifespan of SSDs. The user receives a clear picture of how the drives are operating and how their performance can be optimized through targeted measures.

Main features of O&O Defrag 30 at a glance

- **Improved O&O IntensiveOptimize:** Isolated Windows environment for autonomous and complete optimization of the Windows system with maximum system performance and comprehensive access to system and locked files.
- **New Boot-Time Optimization (BTO):** Before Windows starts, a dedicated Windows environment automatically optimizes the entire system. This means that all files, including normally locked system files, can be defragmented.
- **BitLocker support for BTO and O&O IntensiveOptimize:** Enables use even with BitLocker-encrypted system drives.
- **O&O VisualDisk:** Improved version for visualizing write access to SSD and NVMe drives.
- **O&O StartupManager:** Integrated tool for optimizing programs, tasks, and services when Windows starts.
- **O&O AppBuster:** Integrated tool for completely uninstalling unnecessary desktop and Microsoft Store applications.
- **O&O DiskCleaner:** Automatic removal of temporary and redundant data.
- **O&O Check&Repair:** Checks and repairs Windows components, system files, drives, and the recovery environment based on our O&O DiskImage technology.
- **O&O DriveLED:** Displays read/write access in the taskbar to monitor drive activity.
- **Improved user interface:** A modern view makes it easier for PC beginners to use, while the classic view is retained for professionals.
- **Optimal defragmentation methods:** STEALTH, SPACE, and COMPLETE have been redesigned for more efficient processes. With the SOLID/COMPLETE and SOLID/Quick methods, the program offers special processes for defragmenting SSDs.
- **Update and Health Check:** Automatic updates to the latest version and S.M.A.R.T. functionality for monitoring drive health.
- **Optimization of virtual machines and SANs:** O&O Defrag supports the optimization of virtual machines and Storage Attached Networks (SANs).
- **Dark Mode:** Automatically adapts to the Windows dark mode setting.

Pricing and availability

O&O Defrag 30 is available now for 49.95 USD (single computer license) and 99.00 USD (5 computer license). All prices include 19% VAT.

For those who would like to try the product, a free 30-day trial version of O&O Defrag 30 Professional Edition is available on the official website:: https://www.oo-software.com/oodefrag/.

About O&O Software

O&O develops solutions for corporate customers that not only support them in their daily activities, but also help substantially reduce their costs. Our products for system optimization, data imaging, data recovery, secure data deletion and company-wide administration are pioneers in the Windows technology sector. Together with our worldwide network of partners, we support corporations, companies, public authorities and private customers in over 190 countries, all from our headquarters in Berlin, Germany.
