

O&O DiskImage 19: Improved Windows 11 Backup

Berlin, November 21, 2023

A reliable data backup is indispensable these days. O&O DiskImage 19 offers even faster and more user-friendly options for backing up entire computers, hard disks, and files.

Faster and more convenient Data Imaging

The latest version of O&O DiskImage enables faster and more convenient data imaging. The creation of a boot medium for system recovery and the migration to new hardware have been significantly improved and run almost automatically.

Support for Windows 11 and Windows 10

O&O DiskImage 19 can be used directly under Windows 11 and Windows 10. Existing images from previous versions can of course still be used. Using the included start environment, images can also be restored directly to empty systems, independent of hardware, so that older Windows versions 7, 8 and 8.1 are also supported.

Extended VHD/VHDX Functionality

Working with virtual machines becomes more secure and efficient with O&O DiskImage 19. You can convert image files into virtual images of the Microsoft Virtual Hard Disk (VHDX and VHD) type and create incremental and differential images of virtual disks.

Full, incremental, and differential Backups

The complete image with O&O DiskImage is ideal for a comprehensive backup. It copies all the data of a system or hard disk. This ensures that a complete recovery is possible in the event of a system failure or data loss.

The incremental backup is an efficient method in which, after the first complete backup, only the changes that have been made since the last backup are backed up. This method saves considerable disk space and is faster than a full image. O&O DiskImage makes it easy to schedule and perform incremental backups, which simplifies and optimizes data imaging.

With differential backups, all changes made since the last full backup are saved. This offers a middle ground between full and incremental backups. It requires more storage space than the incremental backup but is faster to restore as only two backup sets are required: the original full backup and the last differential backup.

Further Highlights

- Creation of backups of the entire system (system images)
- Creation of backups of drives and partitions (images)
- Creation of backups of directories and files (file backup)
- Backups can be created completely, incrementally and differentially
- Option to create forensic images (backup of all sectors)
- Option to create images of the sectors in use

- Physical machines can be converted into virtual machines
- Creation of incremental and differential VHD and VHDX files
- Machine Independent Restore (MIR) for easy system migration
- Machine cloning for easy data duplication
- One-click backup for quick and easy data backup
- Restore system backups directly from boot media
- Data backup to boot media for instant backups
- Integration of backups as virtual disks for flexible data recovery
- Support for ISO files and a script interface for automation
- Support for EFI/UEFI systems and plug-and-play functionality
- Optimization of storage requirements for efficient data storage

Prices and availability

O&O DiskImage 19 Professional, including Machine Independent Restore, is available at a price of 49.90 euros. For use on up to 5 computers, we offer the 5-computer license for 69.90 euros. The O&O DiskImage 19 Server Edition, optimized for corporate use, will be available shortly and costs 299 euros.

A free 30-day trial version of O&O DiskImage 19 Professional Edition is available for download on our website. This will allow you to see the performance and functionality of our software for yourself.

Pricing and Availability

O&O DiskImage Professional 19 including machine independent restoration (MIR) costs 49.95 USD, and for use on up to 5 PCs O&O offers 5 licenses for 69.95 USD. All prices include 19% VAT where applicable.

Interested users can download a free 30-day trial version of O&O DiskImage 19 Professional Edition from the O&O website at <https://www.oo-software.com/oodiskimage/>.

The test version allows users to create and restore images/backups from their own computers for a period of up to 30 days. In this way, they can see for themselves the full extent of the product's features and performance. Details about O&O Authorized Partners can be found at <https://www.oo-software.com/en/order/reseller/>.

About O&O Software

O&O develops solutions for corporate customers that not only support them in their daily activities, but also help substantially reduce their costs. Our products for system optimization, data imaging, data recovery, secure data deletion and company-wide administration are pioneers in the Windows technology sector. Together with our worldwide network of partners, we support corporations, companies, public authorities and private customers in over 140 countries, all from our headquarters in Berlin, Germany.
