

O&O DiskImage 22 Premium – The Simplest and Most Flexible Data Backup

Berlin, November 25, 2025

Data backup under Windows faces a dual challenge today: The amount of personal and business data is constantly growing, while cyberattacks are becoming increasingly targeted and destructive. Encrypted systems, deleted files, and damaged installations are virtually impossible to manage without a reliable backup strategy. Antivirus programs can detect or block attacks, but only a complete backup allows you to return to a functioning system in an emergency. Data backup is therefore the only sustainable protection for restoring full access to all data after an attack or technical failure.

With O&O DiskImage 22 Premium Edition, O&O Software introduces a new generation of its backup and recovery solution that meets these requirements with consistent simplification, increased performance, and significantly expanded application possibilities. The new version is aimed at users who need a reliable backup solution that works effortlessly and offers complete control in an emergency.

"Our new version 22 of O&O DiskImage Premium sets new standards in terms of ease of use, speed, and robustness when creating backups. The modern interface allows even beginners to quickly create a complete backup of their PC," says Olaf Kehrer, Managing Director and co-founder of O&O Software GmbH. "Especially in times of daily cyberattacks, it's no longer a question of if you'll be attacked, but only when. Without a data backup, you're lost."

O&O DiskImage 22 allows backups to be seamlessly mounted as drives in Windows. This means content can be searched and reused immediately. Backups can also be created directly as VHDX files or, now, converted later and used in virtual systems.

All backups, reports, and retention policies are bundled in a compact management interface. The status of each backup process is immediately visible, which significantly simplifies planning and monitoring.

The new bootable media is completely hardware-independent. This ensures that data recovery remains fully available even after changing devices or installing new hardware.

O&O DiskImage 22 automatically detects incomplete or corrupted backups, assesses their recoverability, and reports conflicts with target media that are too small, offering appropriate solutions.

Prices and availability

O&O DiskImage 22 Premium is available immediately on the O&O Software GmbH website. Further information as well as a free trial version can be found at: <https://www.o-o-software.com/en/diskimage-backup-your-data>

O&O DiskImage 22 Premium Edition costs 49.95 USD. For use on up to 5 computers we offer a 5-PC license for 69.95 USD. All prices include VAT where applicable.

About O&O Software
