

O&O FileDirect: Secure file transfer via German servers – directly in the browser

Berlin, December 03, 2025

O&O Software is introducing O&O FileDirect, a new service that makes sending sensitive files both easy and secure.

Easy sending – maximum security

With O&O FileDirect, files are encrypted on the sender's device and only decrypted on the recipient's device. Access by third parties – including the provider itself – is technically impossible. "Companies, government agencies, and freelancers, in particular, need a solution that protects sensitive documents without complicating workflows," says Olaf Kehrer, Managing Director of O&O Software GmbH. "O&O FileDirect fills precisely this gap."

German servers and full GDPR compliance

All data transfers take place exclusively via servers in Germany. O&O FileDirect is fully GDPR compliant, does not permanently store any files, and provides users with comprehensive security features: password protection, expiration dates, access logging, and two-factor authentication. A special government tariff is also available for public sector organizations.

Ready to use instantly in your browser

The service can be used directly in your browser – no installation required, regardless of your operating system. Users can share files via link or email, share with multiple recipients simultaneously, or create upload links to securely request files.

Features Overview

- Client-to-client encryption
- German servers, GDPR compliant
- Password protection & expiration dates
- Two-factor authentication
- Detailed logging
- Link sharing, email sending, upload links
- Management of received files

Transparent pricing

O&O FileDirect offers a simple, easy-to-understand pricing model:

- Free: 1–2 GB, depending on registration
- Personal: up to 2 GB per file, 50 GB total sending volume
- Professional: unlimited file size, up to 10 TB total sending volume, unlimited recipients
- Government agencies: individual licenses including free sharing
